Call for Papers:

14th IWH-CIREQ Macroeconometric Workshop: Forecasting and Big Data

Halle Institute for Economic Research and the Centre Interuniversitaire de Recherche en Economie Quantitative (CIREQ) are organizing the 14th Macroeconometric Workshop to be held in Halle (Saale) on December 2–3, 2013.

The workshop provides a platform to discuss new developments in the field of empirical and applied macroeconomic modelling and aims at bringing together academic researchers and practitioners. We invite applied and theoretical papers dealing with panel data, time series and business cycles, economic forecasting or international macroeconomics. Papers that explicitly cover aspects of managing large and complex databases are particularly welcome.

Each conference day is opened by a keynote speaker, followed by contributed papers.

Keynote Lectures:

- Domenico Giannone (Université libre de Bruxelles)

A conference fee will not be charged. Further information will be provided on the website <http://de.amiando.com/Macroworkshop>
